DETAILED ACTION

Specification

1. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

2. The disclosure is objected to because of the following informalities:

Several reference numerals have been used to designate different elements. For example:

- Reference numeral 20 has been used for power conductor (Page 5, line 9) and ground (Page 7, line 7).
- Reference numeral 22 has been used for ground conductor (Page 5, line 9) and signal conductor (Page 7, line 8).
- Reference numeral 24 has been used for power conductor (Page 5, line 10) and ground (Page 7, line 11).

Entire specification should be checked for such duplications.

Appropriate correction is required.

Allowable Subject Matter

3. Claims 1-18 are allowed.

4. The following is an examiner's statement of reasons for allowance:

Prior art does not show protrusions on a first set of interconnect elements engaging a first (power) conductor and protrusions on a second set of interconnect elements engaging a second (ground) conductor as required by independent claims 1, 15 and 18 in combination with other limitation in these claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

Art Unit: 2839

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

5. This application is in condition for allowance except for the following formal matters:

Minor corrections in the specifications.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
